Kaveri Precision Components Pvt. Ltd. - Hosur Plant

Incoming Material Inspection - Standard Operating Procedure

Document No.	QC-SOP-014	Revision	03
Effective Date	15-Mar-2023	Page	See footer
Prepared By	R. Selvam, QC Engineer	Approved By	M. Prakash, QC Manager

1. Purpose

This procedure describes how incoming raw materials and bought-out components are inspected at the receiving area before they are released to stores and production.

2. Scope

Applies to all steel bar stock, castings, forgings and bought-out components received at the Hosur plant.

3. Responsibilities

- **Stores Executive:** receives material, checks quantity against the delivery challan and informs QC.
- **QC Inspector:** carries out sampling, visual and dimensional inspection, and records results.
- **QC Supervisor:** approves acceptance or rejection of the lot.

4. Procedure

1. Stores Executive places the received lot in the Incoming Inspection Area and raises an inspection request.
2. QC Inspector collects the purchase order, drawing and supplier test certificate (if available).
3. Draw **5 samples** at random from every lot, irrespective of lot size.
4. Perform visual inspection for rust, dents, cracks and burrs.
5. Perform dimensional inspection on all critical dimensions using a vernier caliper.
6. If all 5 samples are within specification, the lot is accepted. If any sample fails, the complete lot is rejected.
7. Record results on paper form **QF-07 Incoming Inspection Report** and file it in the QC office.
8. Accepted material is tagged with a GREEN tag and moved to stores.
9. Rejected material is tagged with a RED tag and kept in the **Red Bin area near Gate 2** until it is returned to the supplier.
10. QC Supervisor informs Purchase by email about rejected lots by end of the shift.

5. Records

- QF-07 Incoming Inspection Report (paper) - retained for 2 years.

6. Revision History

Rev	Date	Change
01	10-Jan-2019	First issue
